DETAILED ACTION

Allowable Subject Matter

1. Claims 12-23 are allowed.
2. The following is an examiner's statement of reasons for allowance:

In short, the prior art does not teach or suggest any of the four specific Ir metal complexes.

US 6,830,828 B2 (**Thompson** et al.) discloses Ir metal complexes for use in electronic devices, similar to those presently claimed, but does not teach or suggest the specifically claimed compounds. More specifically, **Thompson** teaches 2-(alkyl- or aryl-substituted phenyl)pyridines. **Thompson** also teaches a Ir metal complexes having mixed ligands, for example, β -diketones (e.g. acetylacetonate) as a ligand along with the substituted 2-phenylpyridines substituents (e.g. Figs. 11, 17, 18, 24, 26, 29, 32, 49, and 50). While the CF_3 - and F- substituents on 2-phenylpyridine are known in the art as ligands for Ir in electroluminescent compounds, as provided by Applicant (see references cited in forms PTO-1449), the combination of references would be, at best, obvious to try.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
